

# SETTING UP APPLICATION ENVIRONMENT

## Install IBM Cloud CLI

<b>Date</b>	04 November 2022
<b>Project name</b>	Smart Fashion Recommender Application
<b>Team ID</b>	PNT2022TMID34024

### Step1: Navigate to cloud.ibm.com

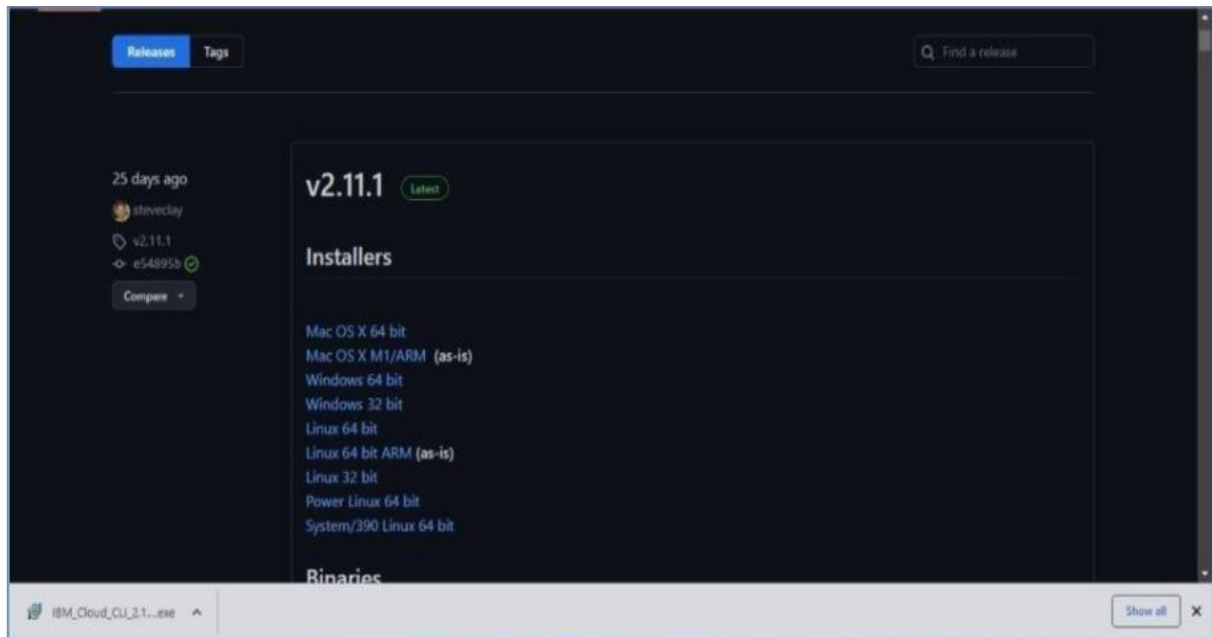

### Step2: Search on Container Registry and get started and follow the steps to install IBM Cloud CLI.

This screenshot shows the IBM Cloud Container Registry catalog page. The browser's address bar displays 'cloud.ibm.com/registry/catalog'. The page features a dark header with the IBM Cloud logo and a search bar. Below the header, the 'Container Registry' title is prominent, accompanied by an 'Estimate costs' button and a 'Get started' button. A sidebar on the left lists 'Compliance EU Supported' and 'Related links' including 'API Docs', 'Docs', and 'Terms'. The main content area is divided into a 'Summary' section, which describes managing Docker container images in a private registry, and a 'Features' section. The features listed are: 'Highly available and scalable private registry', 'Image security compliance with Vulnerability Advisor', and 'Quota limits for storage and pull traffic'. The Windows taskbar at the bottom shows the system clock as 01:12 on 18-11-2022.

This screenshot shows the 'Quick start' page of the IBM Cloud Container Registry. The browser's address bar displays 'cloud.ibm.com/registry/start'. The page has a dark sidebar with navigation links: 'Container Registry', 'Quick start', 'Namespaces', 'Repositories', 'Images', 'Trash', and 'Settings'. The 'Quick start' section includes a 'Location' dropdown menu set to 'Global'. A 'Welcome!' message follows, encouraging users to get started by installing CLIs, setting up a namespace, and pushing an image. The 'Install, Set Up, and Log In' section provides a numbered list of steps: 1. Install the IBM Cloud CLI, 2. Install the Docker CLI, 3. Install the Container Registry plug-in, and 4. Log in to your IBM Cloud account. A terminal snippet shows the command: `ibmcloud plugin install container-registry -r 'IBM Cloud'`. The Windows taskbar at the bottom shows the system clock as 01:19 on 18-11-2022.

**Step3:** Download windows 64 bit installer.

**Step 4:** Open the downloaded.exe file and run it to install ibm cloud cli.
